Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 2 blocking script resources and 2 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

Consider Fixing:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- <http://www.webgozar.com/counter/pic/stat4.gif> (expiration not specified)

Minify CSS

Compacting CSS code can save many bytes of data and speed up download and parse times.

[Minify CSS](#) for the following resources to reduce their size by 591B (16% reduction).

- Minifying <http://backup.charter724.ir/template/charter/js/dist/sweetalert.css> could save 591B (16% reduction) after compression.

Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 24.2KiB (24% reduction).

- Compressing <http://backup.charter724.ir/template/charter/img/namayandeh20.png> could

save 10KiB (29% reduction).

- Compressing <http://backup.charter724.ir/template/charter/img/last.png> could save 5.3KiB (22% reduction).
- Compressing <http://backup.charter724.ir/template/charter/img/int2.png> could save 4.2KiB (31% reduction).
- Compressing <http://backup.charter724.ir/template/charter/img/systemi2.png> could save 2KiB (16% reduction).
- Compressing <http://backup.charter724.ir/template/charter/img/charteri2.png> could save 1.9KiB (18% reduction).
- Compressing <http://backup.charter724.ir/template/charter/ads/support.png> could save 850B (11% reduction).

Should Fix:

Configure the viewport

Your page does not have a viewport specified. This causes mobile devices to render your page as it would appear on a desktop browser, scaling it down to fit on a mobile screen. Configure a viewport to allow your page to render properly on all devices.

[Configure a viewport](#) for this page.

Use legible font sizes

The following text on your page renders in a way that may be difficult for some of your visitors to read. [Use legible font sizes](#) to provide a better user experience.

The following text fragments have a small font size. Increase the font size to make them more legible.

- .final (pixels CSS 13) tall pixels 5 only renders ::. جستجوگر با...رتتر 724 :::
- .final (pixels CSS 13) tall pixels 5 only render others 5 and و بلیط چارتر شرابط نمایندگی...ز و
- .final (pixels CSS 13) tall pixels 5 only render others 7 and پرواز چه...بیر تاریخ است. _____
- .final (pixels CSS 16) tall pixels 6 only renders جهت عضویت بر ر... OIN... کلیک کنید
- .final (pixels CSS 17) tall pixels 7 only renders فعلا تمایل ندارم

Consider Fixing:

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `چا پرواز تعريف...Seat Charetr` and 2 others are close to other tap targets final.
- The tap target `` is close to 2 other tap targets final.
- The tap target `<button class="confirm">ندارم تمايل فعلا</button>` is close to 1 other tap targets final.
