Didactum - Our Business is Remote Monitoring of Critical Infrastructure

Didactum Ltd. with its headquarter in City of Muenster / Germany, is a manufacturer of networked remote monitoring solutions. All our monitoring solutions are engineered in Germany and manufactured within the EU.

Our networked infrastructure monitoring solutions are used wherever downtime is not tolerable. By using Didactum's early warning systems, companies and authorities can effectively protect themselves from a variety of physical and man-made risks. Protect mission-critical infrastructure, such as telecommunication, server room, data center, production or logistics.

Our Products

Didactum Ltd. offers a complete range of SNMP-enabled remote monitoring systems. Starting with a 24x7 monitoring of small and medium-sized infrastructures, up to the holistic monitoring of large data centers. All our remote monitoring appliances work stand-alone. By using networked sensors, these measuring and alarm systems can detect critical state changes and catastrophic events at an early stage.

 **Should Fix:**

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 1 blocking script resources and 3 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

Consider Fixing:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- <http://www.google-analytics.com/ga.js> (2 hours)

Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and execution time.

[Minify JavaScript](#) for the following resources to reduce their size by 1.1KiB (32% reduction).

Consider Fixing:

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `<button type="button" class="navbar-toggle...ar-toggle-menu">Toggle navigation</button>` is close to 1 other tap targets final.
