### Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 13 blocking script resources and 23 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

### Consider Fixing:

#### Enable compression

Compressing resources with gzip or deflate can reduce the number of bytes sent over the network.

[Enable compression](#) for the following resources to reduce their transfer size by 556B (63% reduction).

- Compressing [https://www.disenowebyseo.es/wp-content/plugins/yet-another-related-posts-plugin/includes/styles\\_thumbnails.css.php?width=120&height=120&ver=4.4](https://www.disenowebyseo.es/wp-content/plugins/yet-another-related-posts-plugin/includes/styles_thumbnails.css.php?width=120&height=120&ver=4.4) could save 556B (63% reduction).

#### Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- <https://cdn.ywxi.net/js/1.js> (16.2 minutes)

### Consider Fixing:

#### Size tap targets appropriately

## Mobile

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `<a href="/diseno-paginas-web/">Diseño web</a>` and 17 others are close to other tap targets.
- The tap target `<a href="/sitemap.xml">Mapa web</a>` and 1 others are close to other tap targets.
