Consider Fixing:

Enable compression

Compressing resources with gzip or deflate can reduce the number of bytes sent over the network.

[Enable compression](#) for the following resources to reduce their transfer size by 439B (49% reduction).

- Compressing <http://easywebdesign.com.br/complemento/counterup/counterup.min.js> could save 439B (49% reduction).

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- <http://code.jivosite.com/script/widget/fqqe6r0H7N> (2 hours)

95 / 100 User Experience

 Consider Fixing:

Size content to viewport

The page content is too wide for the viewport, forcing the user to scroll horizontally. [Size the page content to the viewport](#) to provide a better user experience.

The page content is 423 CSS pixels wide, but the viewport is only 402 CSS pixels wide. The following

elements fall outside the viewport:

- The element `` falls outside the viewport.

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `<button id="mobile-nav-toggle" type="button"></button>` is close to 1 other tap targets final.
- The tap target `` is close to 1 other tap targets final.
- The tap target `` is close to 1 other tap targets final.
